Senior Mobile Engineer I Mobile Architecture I Platform Engineering I Kotlin Multiplatform

Website LinkedIn Medium Github

Senior Mobile Engineer with 10+ years of experience building scalable mobile systems across Android and cross-platform ecosystems. Specialized in mobile architecture, Kotlin Multiplatform, and platform engineering, with a focus on modular design, developer productivity, and system scalability. Experienced in working on high-scale applications (up to 100M+ downloads) and improving performance and stability across fintech, edtech, logistics, and consumer platforms, with recent work in mobile observability (OpenTelemetry, Embrace, SigNoz) and AI-assisted development workflows to enhance engineering productivity.

Work Experience

Moniepoint — Senior Mobile Engineer (Platform Team)
Feb 2026 - Present

- Implemented mobile observability using OpenTelemetry (Embrace, SigNoz), improving visibility into app performance, network calls, and production issues.
- Improved platform-level instrumentation and debugging workflows, enabling faster issue detection and resolution.

Independent Mobile Architecture Consultant
Jul 2025 – Jan 2026

- Built TipABish, a Kotlin Multiplatform-based live tipping platform, owning end-to-end development from product design (UI/UX) to scalable architecture.
- Designed and implemented shared business logic using Kotlin Multiplatform, enabling cross-platform scalability.

Wiom — Lead Mobile Developer
May 2025 – Jul 2025

- Contributed to mobile architecture discussions for a Flutter-based telecom app, proposing scalable patterns inspired by Clean Architecture and MVI.

PayPay India — Senior Software Engineer
Jan 2025 – May 2025

- Optimized CI/CD pipelines for mobile SDK development using GitHub Actions, streamlining build and release workflows.
- Built SmaToshi, a goal-based micro-investment prototype, winning the internal PayPay Hackathon.

PhysicsWallah — Senior Software Engineer
Aug 2023 – Dec 2024

- Architected and built AcadFly using Kotlin Multiplatform with ~85% shared code across Android and iOS.
- Led Android architecture for CuriousJunior (1M+ downloads), modernizing the codebase using multi-module architecture.
- Contributed to mobile platforms within the PhysicsWallah ecosystem (100M+ downloads), improving performance and stability at scale.
- Reduced build times by ~30% and improved stability to 96%+ crash-free users.

Shipsy — Senior Software Engineer
Aug 2020 – Jun 2023

- Led refactoring of a legacy logistics app using Clean Architecture and MVVM, improving scalability and maintainability.
- Reduced crash rates by ~20% and improved performance by ~30%.
- Implemented barcode scanning (HHT devices), reducing operational processing time by ~40%.
- Established internal Android engineering standards and best practices.

Core Skills

Mobile Architecture

Clean Architecture | MVI | MVVM | Scalable Systems | Modular Architecture

Cross-Platform & Android

Compose Multiplatform (CMP) | Kotlin Multiplatform (KMP) | Kotlin | Jetpack Compose | Coroutines | Flow

Platform Engineering

CI/CD | GitHub Actions | Mobile DevOps | Build Optimization

Observability

OpenTelemetry | Embrace | SigNoz | Firebase Crashlytics

Data & Tooling

Ktor | Retrofit | REST APIs | Koin | Dagger-Hilt | JUnit | MockK | Kotest | Git

Work Experience

Small World (Crafts Inc.), Senior Software Engineer
Aug 2019 - Mar 2020

- Built Android app aiding students with job search, visa processing, and accommodation in Japan. Reached 5K+ users within the first quarter.

XBios, Software Engineer
Sep 2017 - Jul 2019

- Contributed to feature development and SDK maintenance for large-scale e-commerce apps. a from SDE1 to SDE2 based on performance.

Recon AppMagic, Software Engineer
May 2015 - Aug 2017

- Independently led Android projects from concept to deployment. Gained extensive experience in all development phases, collaborating with product teams for scalable delivery.

Education

C.T.I.E.M.T, Jalandhar

BTech (IT), 2011-2015

- Built Pratiraksha, a personal safety app, and contributed to an AR navigation app for real-time guidance.
